## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. Claims 1-50 are pending in this application.

### ***Response to Arguments***

2. Applicant's arguments filed 01/02/04 have been fully considered but they are not persuasive.

The applicant argues "Swanson et al. Cannot suggest determining whether data stored in the ancillary system is conducive to being processed into the values."

The examiner respectfully disagrees with the above argument because Swanson suggests after client stub 60 has a server (step 104), it sends the client input arguments through network 10 to its corresponding server stub 62 (step 106). The input arguments typically include a security ticket validating the client. The server then processes the request (step 108). More specifically, server stub 62 unpacks the input arguments and calls the function desired by the client application. More specifically, server stub 62 unpacks the input arguments and calls the function desired by the client application. For example, in FIG. 3, server program function 66 returns output arguments (and any error parameters) to the server stub 62, which passes them back to client stub 60 (step 110). Client stub 60 processes response to the request (step 112). More specifically, the client stub 60 unpacks the output arguments and returned them to the client application (step 112) (col. 6, lines 51-65 and col. 7, lines 1-14). The sever receives a query to process and retrieve information. The client stub 60 locates the appropriate server to handle the request (as to identifying an ancillary system associated with the

request data item) wherein the server which is selected to process the data is the appropriate server and the server that does not service the request is the other processing system as claimed in claimed 1.

Please all dependent claims are rejected under the same arguments.

Please see the rejection on 10/07/03 for all rejected claims.

### ***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
